## Projects

---

### Portfolio ([View](#))

All my self projects attached in my profile link

I utilized Next.js to create a high-performance website that provided users with a seamless and fast shopping experience. I also used Tailwind CSS to implement a responsive design that allowed the website to adapt to different screen sizes.

## **E-commerce Dashboard** ([View](#))

React.js, React Router, Laravel , bootstrap

- One of the key features of the website beside to the responsive design is its ability to login or sign up (Authentication) token and refresh tokens , use of protected routes , react skelton and high performance webapplication
- Google authentication
- CRUD for the user or category or product pages
- User permissions and more

## **Food (restaurant) Delivery webapplication** ([View](#))

React.js, React Router, pure CSS

- In this web application there so much features first the app is dynamic ,fully responsive And its in a verybeautiful design.
- Also, Authentication,Filter product depending on categories
- Add to cart and remove and calculating prices and much more logic

## **Application Dashboard** ([View](#))

React.js, tailwind css

- Another Dashboard that has all features of CRUD and more functionality in addition to the pretty and responsive design

## **Task Manager project**

Laravel, php , MySQL

- CRUD operations for tasks and categories
- Authentication and Authorization
- All Relationship types between entities (one-to-one) (one-to-many) (many-to-many)
- Strong APIs for all the requirements
- Using Middlewares for user roles (user/admin)
- Add to favorites and more features
